

AUXILLARY PLUG IN CARD FOR HAX-53R HTC3 & 5 CONTROLLERS.

Features

- Australian Made and designed
- Adjustable Stage Start Point & Differential
- LED Indication of all output
- Relay Can Be Set as Heat, Cool or Both.

Use

The HAX-53R Relay Control Card is intended for use on the HTC3 OR 5 Analogue Range of Controllers.

The HAX-53R allows you to expand HTC3 or 5 Analogue controller with an additional stage of Heating & or Cooling. As this card takes control of the controllers relay usually set aside as a delayed start fan relay on terminals 11 & 12, the fan has to be controlled by other external logic ..ie a time switch or on/off system switch. Stage switch on point and switching differential is adjustable with its ON/OFF status displayed via LED indicators.
